

Technical Data Sheet

PerCP/Cyanine 5.5 Anti-Human CD45

Catalog Number: 106521, 106522

Size: 25 tests, 100 tests

Target Name: CD45, LCA, T200

Regulatory Status: RUO

Product Details

Clone: HI30

Application: FC

Reactivity: Human

Format: PerCP/Cyanine 5.5

Isotype: Mouse IgG1

Antibody Type: Monoclonal

Formulation: Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide and 0.2% (w/v) BSA

Protein Concentration: Supplied at a lot-specific concentration.

Storage&Handling: The antibody solution should be stored undiluted between 2°C and 8°C, and protected from prolonged exposure to light. Do not freeze.

Recommended Usage: For flow cytometric staining, it is recommended to use 5 uL of this reagent per 0.5-1.0 million cells in a 100 μ L volume. Optimal reagent performance should be determined by titration for each specific application.

Excitation Laser: Blue Laser (488 nm)

Background Information

The CD45 antigen (CD stands for cluster of differentiation) is a protein which was originally called leukocyte common antigen. The protein encoded by this gene is a member of the protein tyrosine phosphatase (PTP) family. CD45 is a 180-240 kD single chain type I membrane glycoprotein also known as leukocyte common antigen (LCA) and T200. It is a tyrosine phosphatase expressed on the plasma membrane of all hematopoietic cells, except erythrocytes and platelets. CD45 is a signaling molecule that regulates a variety of cellular processes including cell growth, differentiation, cell cycle, and oncogenic transformation.

Product Data

Human peripheral blood lymphocytes stained with either PerCP/Cy5.5 Anti-Human CD45 Clone HI30 (color-filled histogram) or an isotype control (gray histogram).
