

## Technical Data Sheet

### FITC Human IgG4 isotype control (S228P, L235E)

**Catalog Number:** 303103, 303104

**Size:** 25 ug, 100 ug

**Target Name:** Human IgG4 isotype control

**Regulatory Status:** RUO

#### Product Details

---

**Clone:** 1016AH4M2

**Application:** FC

**Reactivity:** N/A

**Format:** FITC

**Isotype:** Human IgG4

**Antibody Type:** Monoclonal

**Formulation:** Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide and 0.2% (w/v) BSA

**Protein Concentration:** 0.2mg/mL

**Storage&Handling:** The antibody solution should be stored undiluted between 2°C and 8°C, and protected from prolonged exposure to light. Do not freeze.

**Recommended Usage:** Use at concentrations comparable to those used for the target-specific antibody

**Excitation Laser:** Blue Laser (488 nm)

#### Background Information

---

There are four IgG subclasses (IgG1, 2, 3, and 4) in humans, named in order of their abundance in serum (IgG1 being the most abundant). The measurement of immunoglobulin G can be a diagnostic tool for certain conditions. This clone carries the S228P mutation, which helps reduce half-antibody formation commonly seen in the IgG4 subclass. It also includes the L235E mutation, which minimizes unwanted side effects by silencing Fc-mediated immune responses.
